

PRODUCT SPECIFICATIONS

Size: 201.5 x 904

Capacity: 400g / 14oz.

Date: 10-03-08

Revision Orig

1. Cartridge Body:

Extruded H.D.P.E. Broad Molecular Base Virgin Resign

- Inside Diameter 2.028" (51.51mm) $\pm 0.005"$ (± 0.127 mm)
- Finished Tube Length 9.230" (234.44mm) $\pm 0.020"$ to $0.030"$ (0.508 mm to 0.762mm)
- Bodywall Thickness 0.030" (0.762mm) $\pm 0.005"$ (± 0.127 mm)

2. Seam Specification:

- Outside Diameter 2.140" (54.35mm) $\pm 0.010"$ (0.254mm)

3. End Blow Off:

- Aluminum EzO end 20 P.S.I. min.

4. Top Cap Fit:

- Snap Fit Inside / outside seal
- No external protrusions, devoid of tailings or extrusion threading. May be custom colored base on blanket order volume.
- Venting is an integral function of cap design to prevent back-off during filling operations, encapsulation air response or handling abuse.

5. Interchangeability:

- Cap design is functional on grease cartridges conforming to N.L.G.I. plastic or composite specifications.
